JOHN CARROLL HIGH SCHOOL FISHING CLUB • COMMUNITY SERVICE

VIRTUAL MEETUP WATERWAY CLEANUP

Clean up by yourself or with friends. Pick a shoreline, seawall, pier or beach and pull out the trash before it reaches fish, birds, turtles and manatees. Each cleanup earns a maximum of 1 service hour.

1. PICK A LOCATION

Choose a public, safe spot: shoreline park, seawall, boat ramp, pier, mangrove edge or beach access. Check tides and weather first. Low tide exposes the most debris.

2. GATHER SUPPLIES

Gloves, closed-toe shoes, a trash bag or 5-gallon bucket, reusable water bottle, sunscreen and hat. A picker or grabber tool is a bonus.

3. CLEAN UP SAFELY

Stay out of the water and work from shore. Watch for slick algae, wet rocks and seawall edges. Keep your distance from gators, snakes and wildlife.

4. TAKE PHOTOS

Get an action shot of you cleaning at the water, plus a final shot of all your full bags or buckets before you throw them away. No clear photos = no hours.

5. DISPOSE OF WASTE

Put trash in or next to a proper bin. Don't stuff bags into overflowing cans. Loose trash can blow away and end up right back in the water.

6. SANITIZE

Remove gloves carefully. Wash hands with soap and water for at least 20 seconds. Rinse and sanitize your bucket, picker and any gear you used.

7. LOG YOUR TRASH

Go to the Volunteer page at www.jchsfc.com. Select your name from the drop-down, pick the date of your cleanup, then upload your photos.

8. COMMUNITY SERVICE

Once your upload is reviewed, your service hour is approved. Each cleanup earns a maximum of 1 service hour.

ANY DAY IN DECEMBER 2026
